

Our robot cables and movable products are provided with excellent characteristics for supporting factory automation.

Articulated robot

High-flexure, high-speed interface cables
(Gig-E, Camera Link, USB3, 1394b, CoaXPress)

- Flexible
- Excellent flexural durability
- Stable transmission performance

High-flexure cables
(ORP-SL cables)

- Thin
- Flexible
- Excellent durability (flexing/twisting/sliding)

High-speed interface composite cables

- Excellent flexibility
- Excellent flexural durability
- We provide composite products with universal custom designs (high-speed transmission/power supply/controls)

Coil cords

- Ideal for stretching section
- Excellent durability (bending/twisting/stretching)

Cartesian coordinate robot

Parallel cables
(VEYOR Cables)

- Ideal for expanding and contracting sections
- Custom production for small lots
- Complete control for branching processing as well

High-flexure, high-speed interface cables
(Gig-E, Camera Link, USB3, 1394b, CoaXPress)

- Flexible
- Excellent flexural durability
- Stable transmission performance

Industrial microscope

High-speed interface cables
(Gig-E, Camera Link, USB3, 1394b, CoaXPress)

- Flexible
- Excellent flexural durability
- Stable transmission performance

Factory automation

HPCF optical fiber cable

- Excellent flexibility
- Excellent flexural durability
- Flexible with good maneuverability
- No effect of noise on signal

Optical fiber and metal composite cable

- Integration of optical and electrical transmission (for both communication and power supply)
- Flexible
- Excellent flexural durability
- Noise reduction

High-speed interface composite cable

Controller server

High-flexure, high-speed interface cables
(Gig-E, Camera Link, USB3, 1394b, CoaXPress)

- Flexible
- Excellent flexural durability
- Stable transmission performance

Spiral parallel cables
(VEYOR-SP Cables)

- Ideal for expanding and contracting sections
- Custom production for small lots
- Complete control for branching processing as well

Parallel cables
(VEYOR Cables)

- Ideal for expanding and contracting sections
- Custom production for small lots
- Complete control for branching processing as well

Highly bendable power cable
(ORP-D Cables)

- Thin
- Flexible
- Excellent durability (flexing/twisting/sliding)

Industrial endoscope

Thin coaxial cables

- Thin
- Excellent flexibility
- Strong durability in bending and leading
